

## **INTEGRALLY FORMED BRA**

### **ABSTRACT OF THE DISCLOSURE**

An integrally formed bra includes an outer fabric, an inner fabric, two bra cups, two steel rim straps attached with steel rims and a set of clasp device assembly. In assembling, the two steel rim straps are first sewed to the two bra cups at the lower edges respectively. Then the bra cups, outer fabric, inner fabric and clasp device assembly are respectively coated on the peripheries or the needed joints thereof with adhesive. Finally, the outer fabric, inner fabric, bra cups and clasp device assembly are respectively positioned at a predetermined position of a mold to form a bra by hot pressing.
